1. INTRODUCTION

1.1. Purpose and Overview

This Request for Proposals is published to solicit proposals for the provision of a predictive model for Lyme disease and evaluation of environmental risk factors associated with Lyme disease. This will be accomplished by gathering, aggregating, analyzing, and displaying relevant data in order to increase understanding of environmental risk factors associated with Lyme disease. Information obtained through the predictive model will be used to support ongoing Department activities related to Lyme disease prevention.

1.2. Request for Proposal Terminology

ArcGIS – A geographic information system (GIS) software that can be used to manage, analyze, and display geographic information in both desktop and online services.

DHHS – Department of Health and Human Services.

Ecology – The branch of biology that deals with the relations of organisms to one another, and to their physical surroundings.

Epidemiology – The branch of public health that deals with the incidence, distribution, and possible control of diseases and other factors relating to health.

FTP Site – File transfer protocol website. This operates as a file storage/transfer website, but meets State requirements for security.

Lyme Disease – Lyme disease is caused by the bacterium *Borrelia burgdorferi* and is transmitted to humans through the bite of infected blacklegged ticks. Typical symptoms include fever, headache, fatigue, and a characteristic skin rash called erythema migrans. If left untreated, infection can spread to joints, the heart, and the nervous system.

NLDC Land Cover Database – The National Land Cover Database (NLCD) provides spatial reference and descriptive data at thirty (30)-meter resolution nationally. Data are categorized in specific thematic classes such as: urban, agriculture, and forest.

R (Open source software) – R is an open-source software (OSS), which is computer software with its source code made available by the copyright holder who provides the rights to study, change, and distribute the software to anyone and for any purpose. It is used for statistical computing and graphics.

Risk Factor Data Set – Datasets that represent different environmental risk factors that can be classified as environmental exposures that may increase or decrease the risk of disease.

RFP – Request for Proposals. A Request for Proposals means an invitation to submit a proposal to provide specified goods or services, where the particulars of the goods or services and the price are proposed by the Vendor and, for proposals meeting or exceeding specifications, selection is according to identified criteria as provided by RSA 21-I:22-a and RSA 21-I:22-b.

Vector Data – A type of spatial data that uses a coordinate system to represent a point, line or polygon (area).

1.3. Contract Period

The Contract resulting from this RFP will be effective April 1, 2017, or upon Governor & Executive Council approval, whichever is later through August 31, 2017.

2. BACKGROUND AND REQUIRED SERVICES

2.1. New Hampshire DHHS Division of Public Health Services

The New Hampshire Division of Public Health Services (DPHS) is a leadership organization that promotes optimal health and wellbeing for all people in New Hampshire and protects them from illness and injury. DPHS is responsible for serving individuals, families, communities and organizations throughout New Hampshire by delivering high quality, evidence-based services. DPHS responds promptly to public health threats, inquiries, and emerging issues.

DPHS is currently requesting proposals from Vendors to gather, analyze, and interpret data related to Lyme disease because tick-borne diseases, most notably Lyme disease, are a growing public health concern in New Hampshire. Each year there are over one thousand (1,000) reported cases of Lyme Disease in New Hampshire. The statewide incidence is among the highest in the United States.

2.2. Program Goals

The goal of this Disease Ecology Assessment is to provide standardized access to data on Lyme Disease and associated environmental risk factors in order to support ongoing public health actions aimed at reducing risk and disease. The Department's intent is to increase the use of local data to inform decisions related to effective Lyme disease prevention strategies. The final product will be a data visualization that incorporates data from multiple sources including health data on Lyme disease, land cover data on habitat, climate data on meteorological conditions, and vector data on tick abundance.

3. STATEMENT OF WORK

3.1. Data Collection

- 3.1.1. The selected Vendor will obtain data from various sources, including but not limited to:
 - 3.1.1.1. Land cover data (e.g., NLDC Land Cover Database) – Land cover data is publicly available.
 - 3.1.1.2. Meteorological data (e.g., NCEI or PRISM) - Meteorological data is publicly available.
 - 3.1.1.3. Lyme Disease Data (e.g., NH DPHS) - Lyme Disease Data will be shared as an Excel or CSV file via the State FTP site, or will be transferred on approved devices.
 - 3.1.1.4. Others as recommended by the Vendor.
- 3.1.2. The Vendor must access, aggregate, analyze, and display relevant data using geographic information system (GIS) software that is compatible with ArcGIS and other statistical software that is suitable for use with the programming language, R, and other open source tools.

Q2. What metrics will you use to develop the model?

Q3. What scientific literature and previous work will you employ to create the model?

- 3.2.2. The Vendor must provide a description of the model development process and include a summary of overall statistical methods and model performance. As an example: a forward step process may be used to develop a regression model, and model fit may be explained based on metrics such as accuracy and specificity, or model diagnostics such as adjusted R-squared or Akaike information criterion.

Q4. How will you document methods for model development?

- 3.2.3. The Vendor must develop an analysis plan that outlines the statistical analysis and documents protocols so that the analysis is reproducible.

Q5. What steps will you include in an analysis plan?

3.3. Data Visualization

- 3.3.1. The Vendor must provide a visualization of the data, in ArcGIS Online that integrates the raw data layers that are collected, intermediate data layers that are created, and composite data layers that are generated from the statistical analysis.

6.20.Site Visits

The Department may, at its sole discretion, at any time prior to contract award, conduct a site visit at the bidder's location or at any other location deemed appropriate by the Department, in order to determine the bidder's capacity to satisfy the terms of this RFP. The procedure set forth in RSA 21-G:37, IV, shall be the sole remedy available to challenge any award resulting from this RFP. In the event that any legal action is brought challenging this RFP and selection process, outside of the review process identified in RSA 21-G:37,IV, and in the event that the State of New Hampshire prevails, the challenger agrees to pay all expenses of such action, including attorney's fees and costs at all stages of litigation.

The State of New Hampshire sample contract is attached; Bidder to agree to minimum requirement as set forth in the Appendix B.

8.1.2. Penalties

The State intends to negotiate with the awarded vendor to include liquidated damages in the Contract in the event any deliverables are not met.

The Department and the Contractor agree that the actual damages that the Department will sustain in the event the Vendor fails to maintain the required performance standards throughout the life of the contract will be uncertain in amount and difficult and impracticable to determine. The Contractor acknowledges and agrees that any failure to achieve required performance levels by the Contractor will more than likely substantially delay and disrupt the Department's operations. Therefore the parties agree that liquidated damages shall be determined as part of the contract specifications.

Assessment of liquidated damages shall be in addition to, and not in lieu of, such other remedies as may be available to the Department. Except and to the extent expressly provided herein, the Department shall be entitled to recover liquidated damages applicable to any given incident.

The Department will determine compliance and assessment of liquidated damages as often as it deems reasonable necessary to ensure required performance standards are met. Amounts due the State as liquidated damages may be deducted by the State from any fees payable to the Contractor and any amount outstanding over and above the amounts deducted from the invoice will be promptly tendered by check from the Contractor to the State.

(5) Termination for Cause

In addition to Paragraph 10 of the standard terms and conditions (P-37) of this Agreement the Covered Entity may immediately terminate the Agreement upon Covered Entity's knowledge of a breach by Business Associate of the Business Associate Agreement set forth herein as Exhibit I. A reference in the Agreement, as amended to include this Exhibit I, to a Section in the Privacy and Security Rule means the Section as in effect or as amended.
- b. Amendment. Covered Entity and Business Associate agree to take such action as is necessary to amend the Agreement, from time to time as is necessary for Covered Entity to comply with the changes in the requirements of HIPAA, the Privacy and Security Rule, and applicable federal and state law.

Provisions in this Exhibit I regarding the use and disclosure of PHI, return or destruction of PHI, extensions of the protections of the Agreement in section (3) I, the defense and indemnification provisions of section (3) e and Paragraph 13 of the standard terms and conditions (P-37), shall survive the termination of the Agreement.
